Tilak Gaur

tilakjaipalgaur31@gmail.com +91 7875609397 Ahmedabad, Gujarat Wall-E-30 Tilak Gaur

Summary

Motivated Second-Year Computer Science student with a strong foundation in backend development and database management. Experienced in building and deploying full-stack web applications and collaborating in fast-paced competitive hackathons. Passionate about applying algorithms, clean code, and robust database design to solve real-world problems. Eager to contribute technical versatility and strong problem-solving skills to a dynamic software engineering team as a technical intern.

Education

Adani University Bachelor of Technology • 8.5 GPA
Computer Science Ahmedabad, Gujarat • 2024 - 2028

Core Coursework: Data Structures, Analysis and Design of Algorithms (ADA), Database Management Systems (DBMS), Operating Systems, Object-Oriented Programming (Java, C++), Python, and Web Technologies (HTML/CSS/JS).

Languages

English
Conversational

Hindi
Native

Skills

Programming Languages
Python, C, Java, C++, JavaScript, SQL, HTML, CSS

Frameworks
Flask, Streamlit, Flask-SQLAlchemy

Projects

CashScript 2026 - Present
CashScript | Python, Flask, SQL, Flask-SQLAlchemy | Feb 2026

- Engineered a dynamic web application for comprehensive personal finance tracking using a Python and Flask backend.
- Implemented secure backend logic and routing to handle complex data processing, user inputs, and financial management tools.
- Streamlined database operations and relationships using SQL, ensuring efficient query performance and strict data integrity.
